

“The T16 scrubber is the finest machine I’ve ever used. It’s the culmination of Tennant paying attention to users. They took everything they learned and poured it into this machine.”

— JEFFTINGLEY,
PRESIDENT AND CEO,
SPARKLE SERVICES

TENNANT® T16 SCRUBBER WITH ec-H2O™ TECHNOLOGY HELPS SPARKLE SERVICES SHINE

CUSTOMER

Green Seal-certified Sparkle Services, Inc. is a contract cleaner that has earned a reputation as a leader in the building services industry. Sparkle Services designs customized cleaning plans to meet their customers’ specific needs and budgets.

CHALLENGE

Sparkle Services needed a highly efficient, easy-to-maintain rider-scrubber to dry sweep and clean the floors in a 100,000 square foot FedEx distribution center. The scrubber also had to be environmentally friendly as FedEx had recently started a “Going Green” ad campaign.

SOLUTION

The Tennant T16 battery-powered rider scrubber with the dry pre-sweep option was selected because it works great, is easy to maintain, and is equipped with Tennant’s exclusive ec-H2O technology. The T16 scrubber with ec-H2O cleans by electrically converting water into an innovative cleaning solution. This technology cleans effectively, saves money, improves safety, and reduces environmental impact compared to daily cleaning floor chemicals and methods.

RESULTS

“I knew no other company except Tennant could give us what we needed, and we bought the T16 on-site after seeing a demonstration,” said Jeff Tingley, president and CEO, Sparkle Services. “The T16 is the ‘Cadillac’ of auto scrubbers and when I mention the T16, a smile comes on the faces of the operators.”

PRE-SWEEP, ec-H2O – A POWERFUL COMBINATION

“From this point on, the T16 is the machine we’ll be using because the dry pre-sweep feature does such a good job before we scrub the floor,” said Tingley. “It has changed our future because we look at buildings so differently now.”
