Average CDP scores

Final score

Tennant Company overall benchmark

Tennant Company achieved an A-, which is the score 4% of companies responding to CDP achieved, and 4% of companies within Industrials sector. Companies scoring an A- find themselves within the 6% highest scoring companies, and within the 6% highest scoring companies in their sector. On the chart on the far left, the score Tennant Company achieved is benchmarked against average scores within its sector and industry, and against the overall average score. The graph on the left shows the score distribution of all companies responding to CDP supply chain in 2017.

Tennant Company reported the following information:

Targets have not been verified by SBTi
An internal price of carbon is in use
A climate change risk process has been implemented
The CDSB framework is not used in reporting response to climate change

Scope 1 emissions are disclosed
Scope 2 emissions are disclosed
The highest responsibility for climate change lies with senior management
There is engagement with value chain

Supply Chain Climate Change breakdown: category scores

Category scores provide one score for a group of questions with similar subject matter. They can be used to identify areas of strength and areas for improvement. **Please note that your category score will never be of a higher level than your overall score.**

Emissions Management

Measures the extent to which the company measures and manages its emissions

Emissions Management status

A Leadership score in this section suggests that the company has adopted best practices with regard to emissions management and target setting. The company has set meaningful targets, tracks its progress and has implemented emissions reduction activities.

Governance and Strategy

Measures the extent to which the company has policies and structures in place to actively manage climate change strategically

Governance and Strategy status

Achieving Leadership level in this section shows that the company has a sound business framework for climate change, utilizing best practices regarding where responsibility lies, what incentives are provided, how climate change is integrated in the business and how the company communicates about this. Additionally, this company interacts with its value chain on climate change issues.

Risk and Opportunity management

Measures the ability to comprehensively assess climate change related risks and opportunities

Risk and Opportunity Management status

A Leadership score in this section indicates that the organization has adopted best practices with regards to identifying and managing risks and opportunities related to climate change. A detailed risk management procedure is implemented and appropriate management actions are taken to address the risks and opportunities.

Verification

Measures the quality of the third party verification of emissions

Verification status

Tennant Company has submitted third party verification for Scopes I and II emissions, which met CDP Leadership criteria. Verification of emissions is best practice and gives the response more accuracy, demonstrating the credibility of emissions data reported.

Not all companies requested to respond to CDP do so. Companies who are requested to disclose their data and fail to do so, or fail to provide sufficient information to CDP to be evaluated will receive an F. An F does not indicate a failure in environmental stewardship.
