

# 10 TIPS & TRICKS

## TO CREATING A HASSLE-FREE STONE CARE MAINTENANCE PROGRAM

-  **1. USE EQUIPMENT YOU ALREADY HAVE**

TennantTrue® Stone Care Solutions use tools that fit on your current machines.

  - It's significantly more cost-effective than planetary grinding.
  - Hiring a contractor only once for concrete repair and polishing costs as much as buying TennantTrue solutions.
  - It reduces dust and noise associated with traditional restoration methods.
-  **2. KEEP IT EASY FOR EMPLOYEES**

Look for simple, user-friendly methods to prepare concrete floors for coatings.

  - TennantTrue's Diamabrush™ tool attaches like a typical brush so employees already know how to use it.
  - TennantTrue Stone Care tools have the Insta-Fit™ brush adapter\* so they are easy to use.
-  **3. IMPROVE YOUR FLOORS OVER TIME**

Polishing concrete isn't a one-time fix.

  - A standard floor maintenance program will result in improvements over time.
  - Results will be smoother, shinier concrete floors that reflect light and are easier to clean and maintain.
-  **4. DECREASE CHEMICALS AND DUST**

No harsh chemicals are required with TennantTrue Stone Care Solutions.

  - Products are environmentally friendly and odor free.
  - Avoid the dust and noise associated with traditional concrete finishing methods.
  - Chemical-free removal of mastics, glue, adhesives, thin-set, epoxies, coatings and paint.
-  **5. ELIMINATE HASSLES AND REALIZE SAVINGS**

Maintaining your own concrete can help save money over time.

  - Include concrete repair and polishing in your regular floor care maintenance routine.
  - Cut costs by not having to hire outside help for this task.
  - Diamabrush blades are easily replaceable and can be included in your annual operating budget.
-  **6. DEMAND VERSATILITY**

TennantTrue offers stone care tools for a variety of floor conditions, floor types, machines and scrub paths.

  - Diamabrush fits on Tennant models 5680, 5700, T12, T16, T17, T20, and M17.
  - TennantTrue's 3M™ Trizact™ polishing discs fit on Tennant models T300 and T500.
-  **7. MAKE A POSITIVE IMPRESSION**

A highly polished floor leaves customers with a positive impression about your facility and business.

  - It's been shown that facility appearance ratings can drop significantly if floor shine makes a bad first impression.
-  **8. EXPECT PERFORMANCE**

Diamabrush tools are designed to continuously expose diamonds to retain sharp edges and maintain constant floor contact.

  - Will not load up or clog.
  - Remove build up faster than abrasive brushes.
  - Ideal for harsh environments: dirt, grime, oil, and grease.
-  **9. PARTNER WITH A TRUSTED MANUFACTURER**

Tennant has provided consistent excellence in its cleaning products and equipment for almost 150 years.

  - Give your employees durable, high quality cleaning equipment so they can maintain your facility at the level you expect.
-  **10. BUY OEM PARTS**

The right parts are important to the longevity of your cleaning equipment. OEM parts are specifically designed for use in your machines.

  - TennantTrue OEM parts help maximize cleaning performance and durability.
