

REINVENT HOW THE WORLD CLEANS

IRIS[®] Lite

Telemetry solution

Full fleet connectivity to monitor and manage your assets

IRIS[®] Lite telemetry offers a retrofit module that enables connectivity across your fleet of equipment. The only requirement needed is a cellular signal where your machines operate. This solution is ideal for customers who want to track and manage their assets. Effectively monitor machine utilization and location, measure productivity, and make informed decisions leveraging data and insights through the IRIS[®] Asset Manager portal.

Connect your existing fleet

The IRIS[®] Lite battery-powered hardware enables owners to easily connect your fleet of machines and utilize the IRIS[®] Asset Manager portal for effective fleet management.

Locate your assets

Track the approximate location of your connected assets, reducing the amount of time spent locating your equipment.

Measure your productivity

Monitor equipment usage and use data to help properly maintain and deploy your assets. Identify machines that are being under or over utilized to help maximize fleet productivity.

Make informed decisions

Leverage equipment usage, location, and alerts in the IRIS[®] Asset Manager portal to identify how to optimize and maintain your cleaning equipment.

IRIS Lite[®] solution features

Hardware	Battery-powered, no wiring required
Location accuracy	15–30 meters, 50–100 feet
Machine utilization	Estimated based on movement
Data upload frequency	4 uploads per day
Push report format	PDF
Alerts	Machine relocation, low usage, maintenance reminders, no communication
Compatibility	Compatible with your entire floor care fleet
Dimensions (LxHxW)	2.83in x 1.42in x 5.12in 72mm x 36mm x 130mm

IRIS[®] Lite applications

IRIS[®] Lite telemetry is ideal for users with the following needs:

- Retrofit-capable telemetry hardware that is easy to install across your equipment fleet.
- Improved oversight of assets through machine location and relocation alerts.
- A clear view of how and when assets are deployed to optimize productivity.
- Proactive information on when to do preventative maintenance through alerts.
- Dependable and timely reports for informed decision-making.

A protected investment

Tested technology and continued innovation:

Tennant continues to update and improve our proven IRIS[®] technology — delivering more robust monitoring capabilities, enhancing the IRIS[®] platform to deliver more relevant and actionable insights.
