

# Tennant AMR Software 3.5 Update

## 3.5 Release Highlights

- New Preferences Menu in Settings
- Area Fill Improvements
- Mobile Alerts UX
- Performance Improvements

# New Preferences Menu in Settings

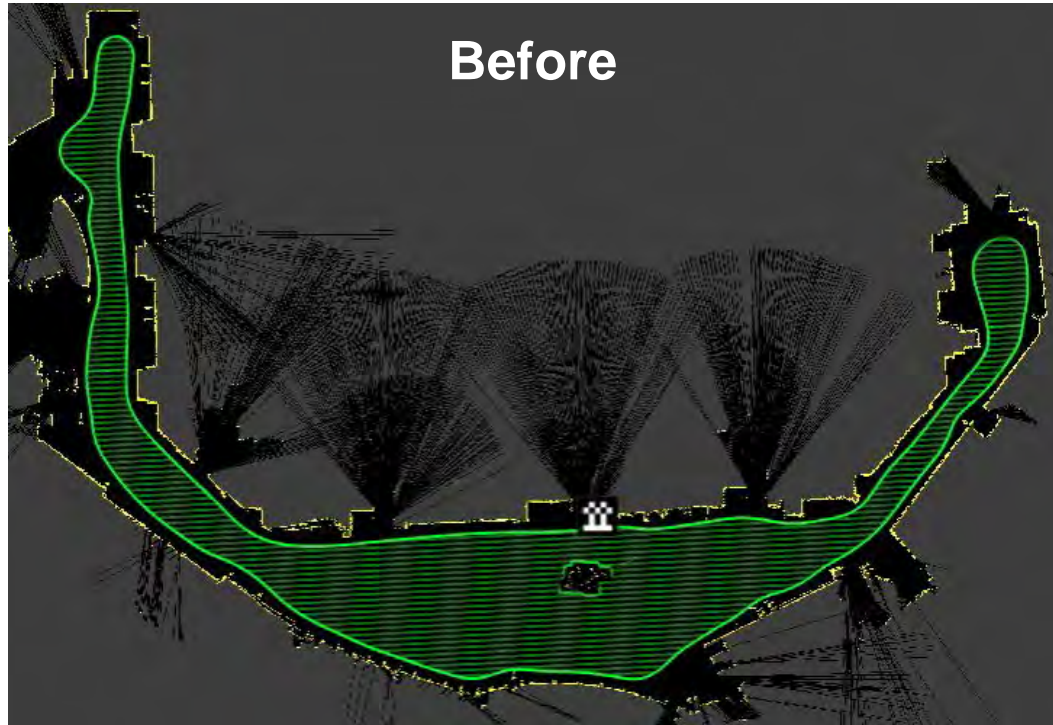

Local Enablement of Optional Features

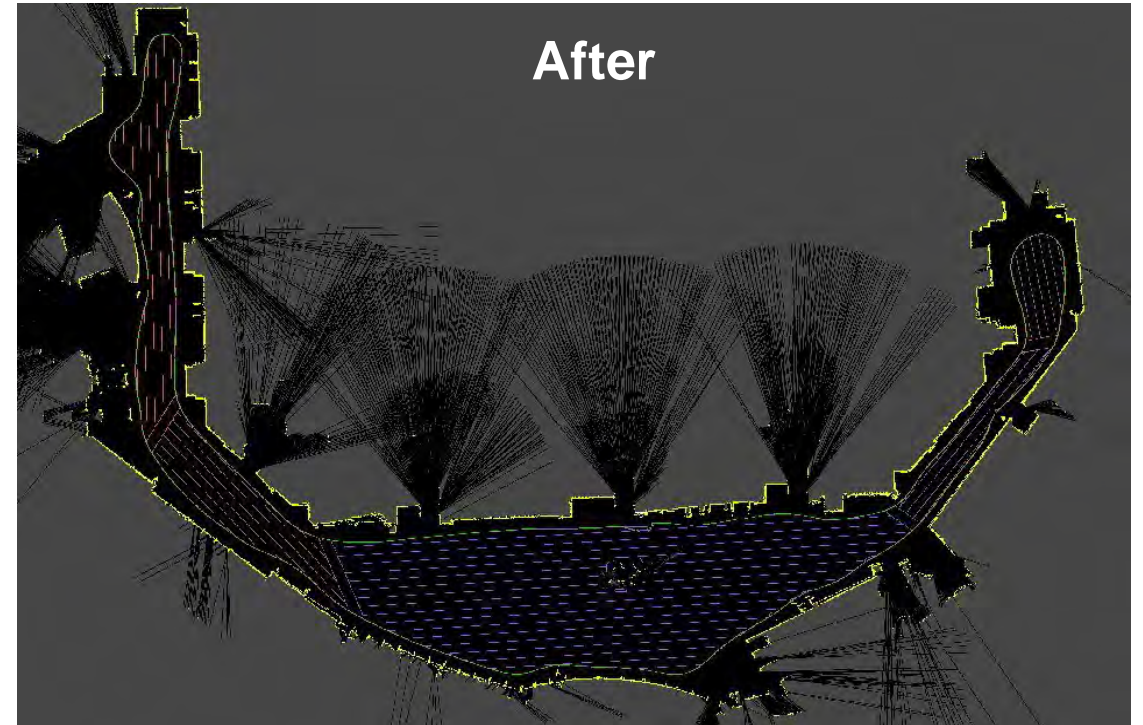

*Note: Area Fill should not be enabled in retail spaces or other environments with narrow or congested spaces*

# Area Fill Improvements

Automated Segmentation of Complex Spaces

- Single Ranking Direction
- Excessive U-turns
- Heavy Overlap
- Constrained to Ideal Environments

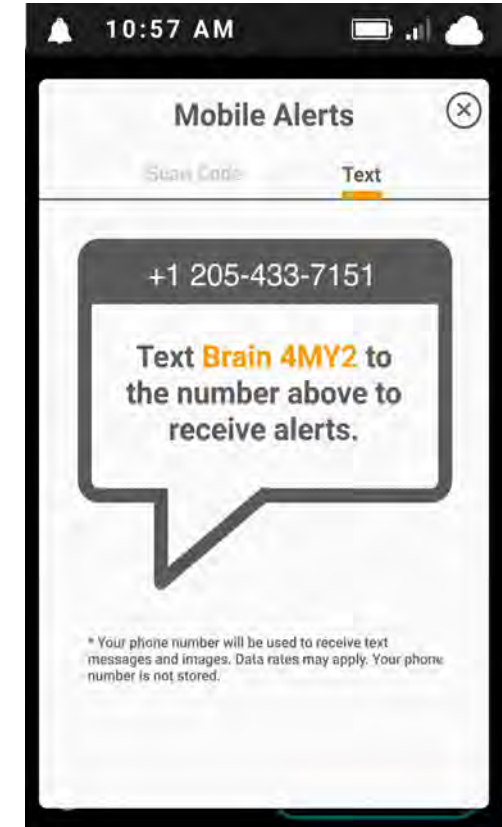

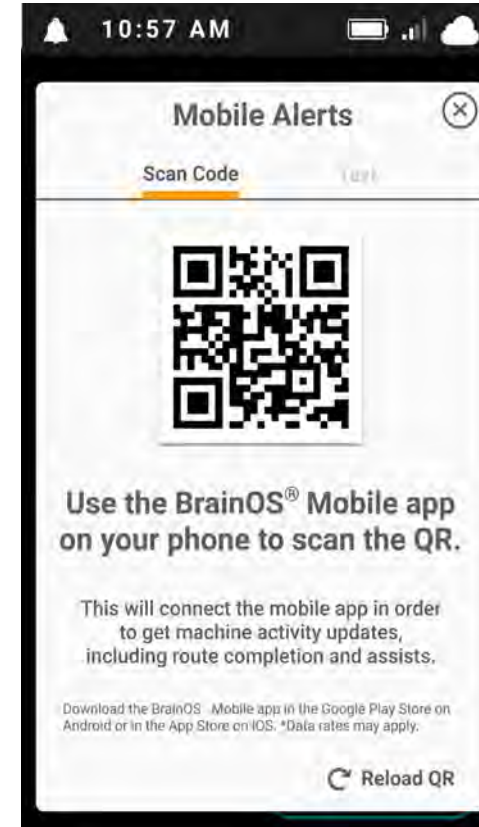

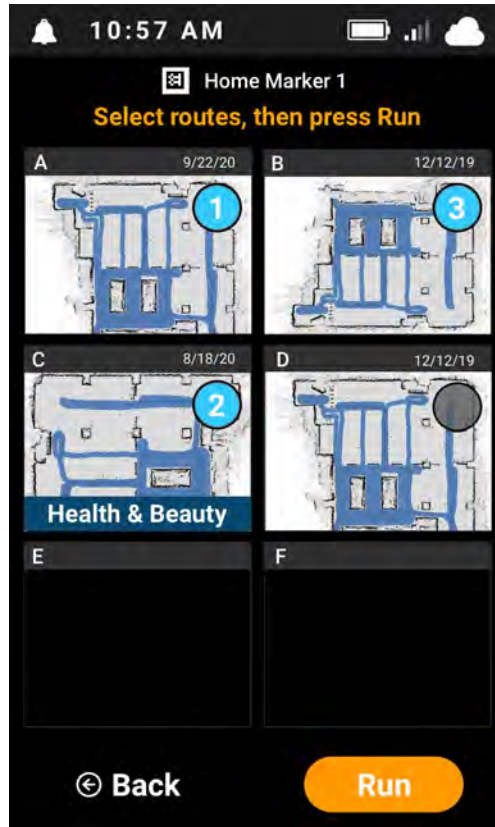

- 5 Unique Sections
- "Bit by Bit" vs. "All at Once"
- Increased Efficiency, Reduced Overlap
- Suits the Real World

# Mobile Alerts UX

An Additional Access Point for Connecting to Mobile Alerts

# Performance Improvements

- Reduction in getting stuck when navigating near or around false assists caused by dark/shiny obstacles.
- Reduced shaking & jerking from the steering wheel during autonomous operation
