

Main Wire Harness Replacement

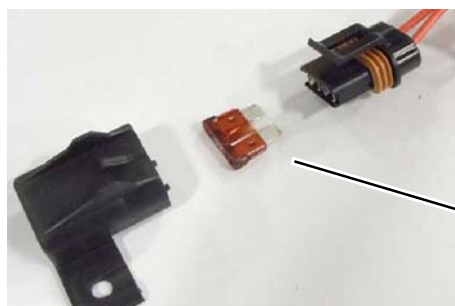

Model: 5680

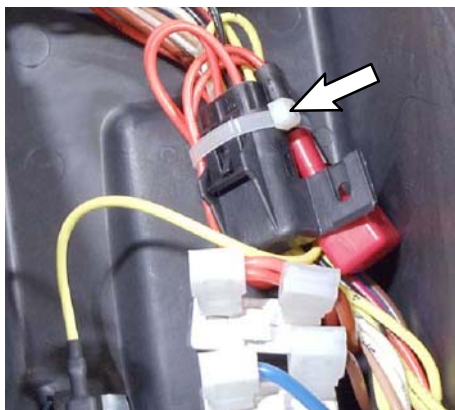

NOTICE: This instruction bulletin applies to 5680 models manufactured before serial 10551746 (Dec 2011). The new replacement harness is equipped with a 7.5 amp fuse to protect the scrub head lift actuator circuit. The installation of the new harness remains the same as the previous harness with the exception of the following wire connection as shown below.

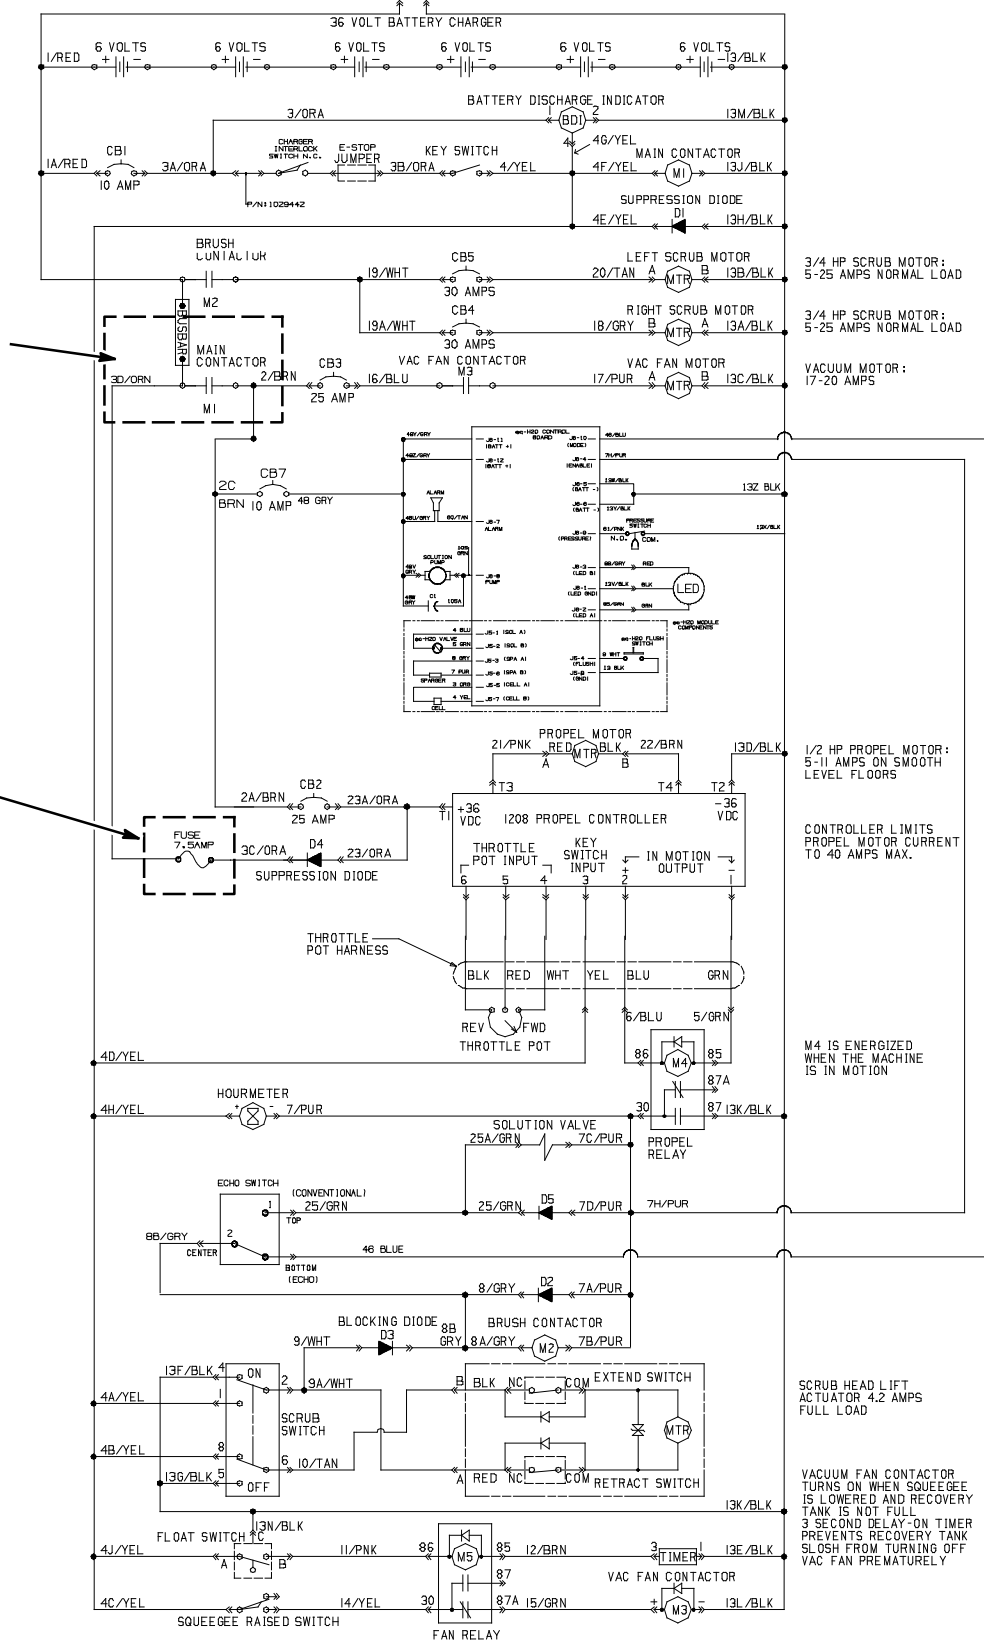

Connect new wire [3D/Orange]
to Main Connector as shown.

New 7.5 Amp Fuse added to the
Scrub Head Lift Actuator circuit.
Replacement Fuse p/n 1016039

Use a zip-tie to secure the 7.5
Amp Fuse as shown.

Please keep this sheet with your owner's manual for future reference.
