V-BP-10

Backpack Harness Retrofit Kit

This kit is intended for V-BP-6 and V-BP-10 models manufactured before December 2014.

INSTALLATION INSTRUCTIONS:

Installation Time: .5 Hours

Kit Contents

Description	Qty.
Dueter Backpack Harness	1
#6 Flat Washer (zip-tied to harness)	2

TOOLS REQUIRED: Phillips screwdriver, pointed tool

FOR SAFETY: Before installing kit, turn machine off and unplug power cord.

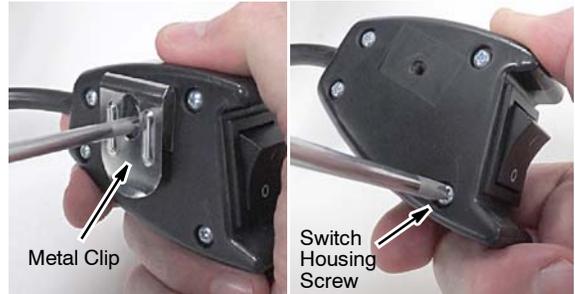

- Place the vacuum cleaner face down and remove the four mounting screws from harness. Discard the old harness and the cord restraint clip. Save the four mounting screws.

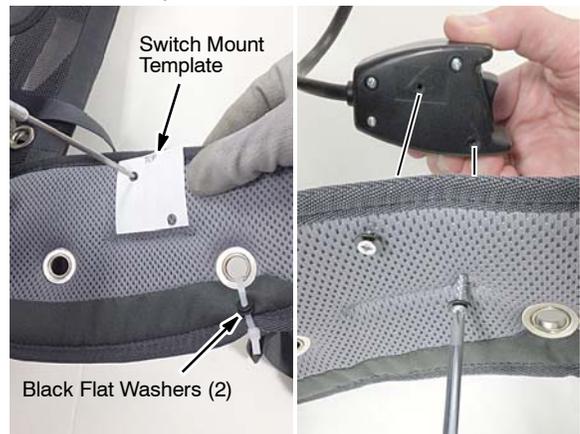

- Using the four saved mounting screws, attach the new harness to the vacuum cleaner as shown.

- Remove the metal clip from the on/off switch. Then remove the lower right screw from switch housing. Save the two removed screws and discard the metal clip.

- Using a pointed tool, carefully create two pilot holes in the harness where the switch mount template is located. Fasten the switch to the harness using the two saved screws and the supplied black flat washers. The supplied flat washers are zip-tied to harness.

- Route the power cord through the cord restraint clip as shown and plug power cord into machine.
