Scrubber

Performance of a scrubber with the mobility of a mop
Dual, counter rotating brushes

Twin Brushes
Counter-rotation of twin brushes pushes solution toward center, rather than splashing off to the side of the machine.

Unique Brush Design
Channels that constantly push solution towards – not away from center. Plus, concentrically stepped bristles trap fluid and prevent splashing.

Squeegee System Design
Placement of squeegee under weight of equipment creates pressure against uneven floor surfaces for better fluid recapture.

Squeegee Location
Location of squeegee immediately behind brushes (vs. behind wheels) retrieves fluid before its fans out to sides.

Change the way you think about cleaning...

meet the i-mop

Over 70% of floors are still cleaned with a mop & bucket. It is time to think differently about cleaning. Mop & buckets are highly maneuverable however they have many issues:

- Extremely labor intensive
- Primarily spread dirt around instead of removing
- Pose slip & fall risks due to wet floors

The patented i-mop combines the maneuverability of the mop with the performance of a traditional scrubber. The i-mop:

- greatly reduces labor costs, up to 10 times faster than a mop & bucket
- dramatically reduces water & chemical consumption
- delivers extremely clean floors with high mechanical agitation
- leaves nearly instantaneous dry floors with water recovery

The i-mop was designed to:

- work in tight spaces and underneath obstacles with its 360 degree handle
- have unlimited mobility with a foldable scrub deck & transport wheels, light enough to pick up
- be simple with easy & intuitive controls for first time scrubber operators

Change the way you think about cleaning…

meet the i-mop
Simple, intuitive controls
Obvious operation – easy to train

Easy swivel operation – even with one hand
No balancing act, pushing or straining— as easy to operate as a mop

Detachable tanks for cleaning solution & recovery water
Easy to replace or change clean solution on the fly, easy to empty recovery water in any sink, virtually no down time

Heavy-duty hinge for 360° steering
Highly maneuverable in small spaces around obstacles and under furniture

Rechargeable modular battery packs
Continuous run-time by swapping out and recharging with an extra set of batteries

Powerful 350 RPM motors
Up to twice the speed of many conventional disk scrubbers

Easy transport wheels
Easily transportable between different areas, levels and buildings

Full-size heavy-duty deck
High productivity – i-mop XL cleans & dries 1,000 sq ft of obstructed space in less than 5 minutes

Low profile & folding design
Fits under furniture and counters and gets into tight spaces. Deck folds for narrow storage.

**WARRANTY**

See your local representative for warranty information

---

**MARKETS:** Education | Healthcare | Retail | Restaurants | BSC | Public Venues

**APPLICATIONS:** Small Spaces | Obstructed Spaces | Critical Spaces

---

**tanks**

Extra quick-connect color-coded tanks for multiple cleaning solutions can be carried.

**pads**

A full range of pads to handle a wide variety of soil types, floor types and cleaning applications.

**batteries & chargers**

i-mop’s lightweight lithium-ion batteries are part of the technology that makes i-mop small enough to get in tight spaces and still be easily transportable up and down stairs and in a car. Extra batteries allow the i-mop to run 24/7. Optional wall chargers are available. Get longer runtime (90 minutes) on the i-mop XL with gray batteries.

**brushes & collars**

A variety of brushes are available for your i-mop, including soft, medium, and hard bristles. Color-coded brush collars in HACCP colors are also available.
